Projects

DevUnity

A multi-user coding platform.

 [DevUnity](#)

- Built **DevUnity** using the MERN stack, delivering a dynamic and responsive development environment.
- Crafted an intuitive and accessible user interface with **Tailwind CSS** and **Aceternity-UI**, optimizing user experience.
- Engineered a multi-user coding platform powered by **AceEditor** and **Socket.io**, equipping admins with tools to manage room settings, passwords, and programming language preferences.
- Designed a **comprehensive room system** featuring password protection, private room settings, and integrated **live chat** for seamless collaboration.
- Developed a **full-fledged user management system**, enabling profile customization, account deletion, and robust password recovery options.

ReactJS, Socket.IO, NodeJS, TinyMCE, AceEditor, AceternityUI, TailwindCSS

DevFlood

A StackOverflow clone.

 [DevFlood](#)

- Developed a **StackOverflow clone** with **Next.js 13**, leveraging a modern and efficient application architecture.
- Built core features for **question and answer management**, including editing, view tracking, upvotes, and downvotes.
- Designed **tags and community sections** to enhance content organization and user engagement.
- Integrated **advanced filtering, search, and pagination**, ensuring seamless navigation and content discovery.
- Implemented a **basic recommendation system** using tags to suggest relevant content to users.

NextJS, Server Actions, Webhooks, Markdown JSX (MDX)
